Applied ethics is not about man as an object, but as a subject to be perceived and understood making him able to combine the fundamentals of the meaning with the issue of identifying moral rules. The book “Ethics in the spheres of life” (edited by S. Morandini, Fondazione Lanza) helps us to easily understand what “applied ethics” is and what it really means.

What to do? What and how to responsibly choose when a patient’s life is on the line…, when an economic choice involves the perspectives of entire categories…, when climate change endangers the quality of life of future generations …? To face such demanding questions a discipline called applied ethics is born and, in recent years, it has been given a remarkable diffusion. If the word “ethics” refers to a philosophical tradition already action-oriented, the adjective “applied” adds the reference to the concreteness of situations in need of judgment.

The book “Ethics in the spheres of life”, edited by Simone Morandini (Proget Edizioni, 2010), opening the series “Quaderni di Etica Applicata”, comes out in occasion of the 10th anniversary of the journal “Etica per le professioni - Questioni di etica applicata”. In the book reflections and insight materials discussed during the First National Forum on Applied Ethics (“Etica oggi, dove, come e perché” - held on October 23, 2008 in Padova, promoted by the Fondazione Lanza and sponsored by Banca Etica) are presented.

Through different contributions, a comprehensive introduction to applied ethics emerges both in its main problematic cruces: meanings, interpretations, models, perspectives (cfr. contributions by R. Chadwick, J. Verstraeten, A. Autiero, R. Mordacci); and in its main operative areas: technology (A. Bondolfi), bioethics (F. Turoldo), environment (M. Mascia), politics (L. Biagi) and economics (S. Zamagni).

Interesting and useful key to the reading and ground for discussion on ethics in the spheres of life is the document at the beginning of the book “The Applied Ethics challenge” elaborated by the “Ethics, Philosophy and Theology” Project of the Fondazione Lanza.

Lorenzo Biagi
General Secretary, Fondazione LANZA
INTRODUCTION / Ethics and its application 7

DOCUMENT / The Applied Ethics challenge 11

FIRST SECTION

• MEANINGS / What does it mean "applied" in applied ethics?
  Ruth Chadwick 19

• INTERPRETATIONS / Why applied ethics is more than merely a matter of applying principles
  Johan Verstraeten 37

• MODELS / Practical Ethics: Unity and Plurality
  Roberto Mordacci 61

• PROSPECTS / Ethics application as an experience interpretation
  Antonio Autiero 81

SECOND SECTION

• ETHICS AND TECHNOLOGY / Technology: which conjugation in applied ethics?
  Alberto Bondolfi 101

• ETHICS AND POLITICS / Living together between ideals and reality: a demanding application
  Lorenzo Biagi 117

• ETHICS AND ENVIRONMENT / Spreading and promoting a new culture of sustainability
  Matteo Mascia 129

• BIOETHICS / General principles and singular stories: a difficult synthesis
  Fabrizio Turoldo 143

• ETHICS AND ECONOMICS / Economic theories produce behaviours
  Stefano Zamagni 153
